

EcoWorld Waste Recycling Services

EcoWorld Recycling is providing a waste recycling service for private households in Watamu. This entails collection of recyclable waste once per month for a fee of KSH1000.

This service aims to recover recyclable waste materials, reduce waste going to landfill and to raise awareness on best waste management practices and create jobs for local women and youth. Our target is to initially recruit 100 households in Watamu into this new enterprise which will make it sustainable into the future.

Terms and Conditions

1. The recyclable waste we collect includes:
 - **Hard Plastics** (bottles, containers e.g. shampoo, yoghurt, bleach, ice cream, motor oil, single use plastic etc)
 - **Glass** (wine and spirits bottles, jars etc)
 - **Metal** (food and drinks tins, scrap metal)
2. EcoWorld will provide 3 labelled sacks for separation and storage of the recyclable waste.
3. The EcoWorld team will meet with staff members and instruct them how to separate waste.
4. Each client enrolled in this service will provide contact details of the staff in charge of handling the waste for ease of the EcoWorld team to coordinate collection.
5. Collection of waste is done at the end of each month. However, in the event that a client requires more collections to be made within the month, this would attract an incremental charge to be agreed with the client.
6. Clients can be invoiced monthly, quarterly or annually.
