

MAY 2025 REPORT

Firstly, we have all had a truly terrible week of power supply problems as the wind and the rain emphasises the fragility of our infrastructure. Last Monday we sent our petition to the MD of KPLC in Nairobi and also to Senior KPLC managers at County and Regional level. We then had lots of interactions with several of them including with the MD in Nairobi. He is very keen that all outages are recorded on the KPLC app and so whenever possible please do that as well as reporting on this forum. I tried to get a face to face meeting with him in Nairobi but he referred us to the people on the ground. He has nominated an engineer to oversee what needs to be done to correct our situation and we will engage with him to try and work through the issues. They are focussing on getting the infrastructure working properly before they will talk about a Watamu based van and crew. Needless to say we will keep pursuing this.
