

## **MARCH 2023 POWER SYNOPSIS**

I apologize for being slow to report on March's power data but we wanted to engage with senior management at KPLC with our statistics before reporting. We have now had that engagement and KPLC have asked to see our statistics in the hope that this will help them secure some necessary equipment.

March was a very mixed month. The total reports have reached an all time high but at the same time we had nine clear days when no one reported. This is above the average for the last three years. Two of the bad days were regional / national problems and a third was caused by a water truck. We are clearly nowhere near a satisfactory situation but we continue to press KPLC regionally.
