

## **September Power Synopsis**

September was a significantly better month for reports of power outages. There were about one quarter of the number of reports that were being made in May, June and July, and half the number made in August. There were also about one quarter of the number of 'red days' when ten or more people report than we have had for the last six months. We are still getting many days when one or more households report an outage. KPLC have done a lot of maintenance work in the last two months which has caused this improvement and they know that there is still more for them to do.
